

Django project, student's learning management app

Instructions

Django Project Title

Student Learning Management App

Description:

The Student Learning App is a Django-based web application designed to enhance students' productivity and learning experience. The platform offers a user-friendly interface that combines essential tools such as a to-do list, blog creation, and image uploads for storing notes, helping students organize their academic tasks and share their learning journey.

Project requirements:

1. To-Do List:

- Allow users to create, update, and delete tasks.
- Categorize tasks (e.g., academic, personal, deadlines).
- Set reminders and due dates for tasks. (optional)
- Mark tasks as completed for progress tracking.

2. Blog Section:

- Enable students to write and publish blogs about their learning experiences, tips, or projects.
- Rich text editor for formatting content (optional)
- Blog categorization and tagging for easy navigation (optional)
- Comments and like features to engage readers (similar to feedback app)

3. Image Uploads for Notes:

- Allow users to upload and organize images of their handwritten or digital notes.
- Categorize uploaded images by subjects or topics (optional)

- Provide image preview and download options.

Project procedure:

This project should cover the following core features of Django:

Part 1: Setting up the Project and App

1. Create a GitHub repository as 'ET721_lab_student_app'. After it, open the repository in codespace.
2. In codespace:
 - Install the python virtual environment.
 - Connect to the virtual environment and run the Django app to test.

```
python manage.py runserver
```

3. Set Up Django Project

- Create a new Django project named 'studentapp'.
- Inside this project, create a Django apps needed for this project, for example 'to_do_list', 'blog', and 'upload_notes' app.

4. Configure Settings

- Add the feedback app to the INSTALLED_APPS list in your project's 'settings.py' file.

Part 2: Define the Model

1. In this part, you will define a single model to represent each of the apps, for example, 'to_do_list', 'blog', and 'upload_notes' model.

2. Run Migrations

- Run makemigrations and migrate to create the database table for your model.

```
python manage.py makemigrations
```

```
python manage.py migrate
```

Part 3: Develop Views

Create views to display items and handle blog post, blog feedback, and upload_notes submissions.

Part 4: Create forms

Write a form for blog post, blog feedback, and upload_notes submissions.

Part 5: Design templates

- Create a HTML file of each app: blog post, blog feedback, and upload_notes app.
- Style each app.

Part 6: configure URLs

Define routes for viewing items and handling blog post, blog feedback, and upload_notes submissions.

Part 7: Styling, test and deploy the system

Submission Requirements

1. Code Structure

- Ensure code is organized into models, views, urls, templates, and forms.
- Keep code clean and follow Django best practices.

2. Documentation

- Include a README.md file that describes the project and provides instructions on how to set up and run the app.

3. Publish Django

- Publish your Django project through Heroku or pythonanywhere. Will be shown in during class lecture.

-

Tech Stack

- **Backend:** Django Framework.
- **Frontend:** HTML, CSS, JavaScript (optional integration with frameworks like React).
- **Database:** SQLite (development)

Lab schedule

1. Complete Part 1, 2, and 3 during the class on Monday, December 2, 2024
2. Complete Part 4, 5, and 6 during the class on Friday, December 6, 2024.
3. Complete Part 7 during the weekend and post Heroku and GitHub repository's URL by Sunday, December 8, 2024.

Grading:

- 10 points. Grade Part 1, 2, and 3 by the end of class on Monday, December 2, 2024
- 10 points. Grade Part 4, 5, and 6 by the end of class on Friday, December 6, 2024.
- 50 points. Publish completed app by December 8, 2024
- TOTAL POINTS: 70 points.

Submissions

Submission is restricted outside of availability dates.

Activity Details

Task: Submit to complete this assignment

Assessment

10 / 70 F

 Overdue - Last Fri at 2:00 PM

 Available until Dec 6, 2024 2:00 PM. Submission restricted after availability ends.
